Paris, September 7, 1960

COORDINATING COMMITTEE  
MEMORANDUM BY THE GERMAN DELEGATION  
ON THE EXPORT OF FRIGEN TO RUMANIA

The German authorities have received an application to export

108 kg Frigen 22 (Monochlorodifluormethane)  
covered by item 17 of the IANL  
valued at 400,--\$

to Rumania. The 108 kg are requested for the freezing installations of an equipment making polyacrylnitril fibres (Dralon). The equipment has been shipped in 1958/59 and is valued at 7 millions dollars. After installation of the equipment it was noted that the freezing installation, filled with another freezing agent not covered by the list, does not obtain the low temperature requested. This agent has therefore to be replaced by Frigen 22 (Monochlorodifluormethane).

In view of the civilian end-use the German authorities would like to grant the licence. The German Delegation submit the request as an ad-hoc-case and hope that no objections will be raised. They will be grateful to receive the views of Governments at an early opportunity.
